DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP'745 substantially for the reasons of record.

The amendments and remarks filled by applicants in their response dated 11-06-08 have been fully considered. Arguments regarding claims 1-19 have been fully considered, however, such arguments have not been fully convincing. Applicants have argued that the prior art does not teach the process and article claimed. In response, the examiner submits that independent claims 1 and 10 do not claim any value for the surface resistance. Also, the applied reference on page 4, lines 1-15 clearly states the deposition of the layer of metal on nuclei. However, the examiner concludes that claims 2 and 11 may be allowable over the prior art if rewritten in the independent form.

3. Claims 2 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to leszek b. kiliman whose telephone number is 571-272-1509. The examiner can normally be reached on M-T, 6.30-5.00.
